Key Partners

Who are our Key Partners?
Who are our key suppliers?
Which Key Resources are we acquiring from partners?
Which Key Activities do partners perform?

MOTIVATIONS FOR PARTNERSHIPS:
Optimization and economy, Reduction of risk and uncertainty, Acquisition of particular resources and activities

Key Activities

What Key Activities do our Value Propositions require?
Our Distribution Channels?
Customer Relationships?
Revenue streams?

CATEGORIES:
Production, Problem Solving, Platform/Network

Key Resources

What Key Resources do our Value Propositions require?
Our Distribution Channels?
Customer Relationships
Revenue Streams?

TYPES OF RESOURCES:
Physical, Intellectual (brand patents, copyrights, data), Human, Financial

Value Propositions

What value do we deliver to the customer? Which one of our customer's problems are we helping to solve? What bundles of products and services are we offering to each Customer Segment?
Which customer needs are we satisfying?

CHARACTERISTICS:
Newness, Performance, Customization, "Getting the Job Done", Design, Brand/ Status, Price, Cost Reduction, Risk Reduction, Accessibility, Convenience/Usability

Customer Relationships

What type of relationship does each of our Customer Segments expect us to establish and maintain with them? Which ones have we established? How are they integrated with the rest of our business model? How costly are they?

Channels

Through which Channels do our Customer Segments want to be reached? How are we reaching them now? How are our Channels integrated?
Which ones work best? Which ones are most cost-efficient?
How are we integrating them with customer routines?

Customer Segments

For whom are we creating value? Who are our most important customers? Is our customer base a Mass Market, Niche Market, Segmented, Diversified, Multi-sided Platform

Cost Structure

What are the most important costs inherent in our business model? Which Key Resources are most expensive? Which Key Activities are most expensive?

IS YOUR BUSINESS MORE: Cost Driven (leanest cost structure, low price value proposition, maximum automation, extensive outsourcing), Value Driven (focused on value creation, premium value proposition).

SAMPLE CHARACTERISTICS: Fixed Costs (salaries, rents, utilities), Variable costs, Economies of scale, Economies of scope

Revenue Streams

For what value are our customers really willing to pay? For what do they currently pay? How are they currently paying? How would they prefer to pay? How much does each Revenue Stream contribute to overall revenues?

TYPES: Asset sale, Usage fee, Subscription Fees, Lending/Renting/Leasing, Licensing, Brokerage fees, Advertising
FIXED PRICING: List Price, Product feature dependent, Customer segment dependent, Volume dependent
DYNAMIC PRICING: Negotiation (bargaining), Yield Management, Real-time-Market

Key Partners

- Institutional Partners: Polytechnique Montréal (research and incubation) and Urgences-santé (pilot deployment).

- Clinical Partners: MUHC (McGill University Health Centre), specifically the Royal Victoria Hospital for field testing.

Regulatory Partners: Health Canada for Class I/II medical device certification.

Supply Chain: Tier-1 manufacturers for NFC chips and medical-grade silicone.

Key Activities

Systems Engineering: Designing ruggedized, IP68-rated hardware and zero-power NFC induction systems.
Software Development: Building the "Command Center" dashboards and optimizing the offline-mesh synchronization protocol.
Regulatory Navigation: Securing ISO 13485 certification and Health

Key Resources

- Multidisciplinary Team: A core of Mechanical, Electrical, and Software engineers with pedigree from Lockheed Martin and Oronos.
- Proprietary Tech: The offline-mesh data sync protocol and passive NFC architecture.
- Institutional Capital: The $750,000 seed investment for mass-production tooling and certification.

Value Propositions

- For Paramedics: Eliminates the 30% triage error rate by replacing paper with a field-indestructible digital sync.|

- For Hospitals: Ends the 10.5-hour information blackout with real-time visibility into incoming patient vitals.

- For the System: Reduces the $1.7B in annual malpractice losses through continuous, audited digital tracking.

- Operational Reliability: Zero-power dependency, IP68 durability, and $1.50 price point.

Customer Relationships

- Institutional Moat: Leveraging the 85% "Buy Quebec" priority to act as a "Preferred Infrastructure Vendor".
- Consultative Pilot: Hands-on integration with hospital IT departments during the 6-month MUHC pilot phase.
- Mission Critical Support: 24/7 readiness assurance through the SaaS Command Center

Channels

- Direct Sales: B2G (Business-to-Government) and B2B sales targeting provincial healthcare networks.
- Partnerships: Working directly through Urgences-santé and EMS distribution networks.
- Professional Networks: Utilizing Polytechnique alumni and industry connections from Lockheed Martin and Oronos.

Customer Segments

- Quebec Healthcare Modernization: Specifically targeted at the $5.9B digital modernization budget.

- North American EMS: A $43.5B broader market including municipal ambulance services and mass casualty response teams.

- Institutional Hospitals: Large networks like the MUHC seeking to reduce malpractice risk and wait times.

Cost Structure

- R&D & Certification (40%): Combined $120k-$150k for Health Canada and ISO audits.

- Production & Scale (30%): Mass-production tooling to drive unit costs down from $125 (prototype) to $0.30 (final).

- Pilot Operations (30%): Staffing and infrastructure for the MUHC 5,000-unit deployment.

Revenue Streams

- The Blade (Hardware): $1.50 per consumable band, sold in high-volume institutional contracts.

- The Razor (Software): $10k–$50k annual SaaS "Readiness Fee" per facility for the Command Center dashboard.

- Margins: Targeted 80% gross margins at scale.
